CHRIST (DEEMED TO BE UNIVERSITY)

DEPARTMENT OF MATHEMATICS

CALCULUS USING PYTHON

MAT112-2

E-RECORD

Submitted by:

Name: **Sabari K**

Register No.: **2340154**

12th April, 2024

Table of Contents

Unit I: Fundamentals of Python Programming

1. Getting Started with Python
2. Variables
3. Data Structures
4. Functions
5. 2-D Plots
6. Scatter Plots
7. 3-D Plots
8. Vector Plots
9. Surface Plots

Unit II: Symbolic and Numeric Computations

1. Use of Sympy and Numpy packages
2. Basic Algebraic Operations with Polynomials, Rational Functions, Trigonometric Functions, Exponential and Logarithmic Functions
3. Solving Algebraic Equations
4. Limits, Derivatives, and Functions
5. Series Expansions
6. Evaluating Taylor Series

Unit III: Solving Differential Equations

1. First Order Differential Equations
2. Logistic Growth Model
3. Predator-Prey Model
4. SIR Model
